ROLES & RESPONSIBILITIES

Contributed to 3 internal projects focused on the healthcare industry and 1 client project, handling various aspects of web development and design.

Page Development: Developed and optimized multiple pages for both in-house and client projects, including service pages, case studies, and testimonial pages, with a focus on clear, user-friendly layouts and SEO optimization.

Canva: Design custom infographics, banners, and promotional visuals for blogs, case studies, and social media, ensuring they aligned with branding guidelines and clearly communicated key product/service messages.

SEO Implementation: Applied SEO best practices across all pages and content, including meta tags, keyword integration, and content structure, to improve organic search rankings and drive more traffic to the sites

OTHER PROJECTS

Mothi Millet: Developed a responsive and user-friendly website for Mothi Millet Foods using WordPress, showcasing products, integrating e-commerce functionality, and enhancing the brand's online presence.

CliqOver: I worked as a web developer on Cliqover, a platform that helps agencies create websites for businesses using WordPress. My responsibilities included building and customizing WordPress sites, ensuring they were responsive, user-friendly, and aligned with client requirements. I handled theme development, plugin integration, and site optimization to improve performance and user experience.
